

Ran Davis

Mr. Davis is a business professional and principal systems architect with over 25 years of experience in the computer software industry helping companies utilize technology to enable their strategic capabilities. Mr. Davis is a 2011 Texas A&M Distinguished Former Student of the Computer Science and Engineering Department recipient.

Mr. Davis has been an individual technologist, Team Lead, Application Designer, System Architect, business owner, and strategic business consultant. Since 1998, Mr. Davis has been an entrepreneur focused on running businesses based upon larger profits over higher revenue. He has started multiple technology companies of various business models including a traditional brick & mortar technology consulting firm; a “near-shore” product development consulting firm; and a product incubator / product development firm.

Mr. Davis is also involved in a partnership in food services with James Beard Award winning Chef Jimmy Schmidt. Together they have started a food fulfillment business focused on fine dining specializing in Wagyu beef and hand caught Pacific Salmon & Halibut. They also have created value-added food products that are sold on an OEM basis (cookies, wafers, meat sticks, beef jerky, pizza crust, hamburger & hot dog buns). They have also opened their first restaurant – Lucky’s Noble BBQ – in Detroit in 2018.

Through 2018, all of Mr. Davis’ businesses have been self-funded and experienced consistent revenue growth and profitability.

Mr. Davis has a long history of industry firsts in delivering business applications suites based upon next-generation technologies. He has successfully been resolving business problems through the delivery of software products utilizing client/server, web-enabled, and service-oriented architectures.

Mr. Davis has held senior systems architect positions on several client/server and Internet-based projects for industry leading financial services companies, including Fidelity Investments' acclaimed on-line Internet trading system. These products have received broad praise and several industry awards from publications such as the Wall Street Journal and the Financial News Network.

In addition to assisting companies achieve their strategic capabilities through technology, Mr. Davis has created and maintains a suite of products aimed primarily at the clay target shooting communities.
